Proven Genetics with Strong Eastern Performance

- Solid agronomics with strong performance across yield environments
- Moderate plant height with dependable standability
- Consistent performance across soil types

Adaptation to Soil Types

Drought Prone	Best
High pH*	Fair
Highly Productive	Best
Moderate/Variable Environments	Best
Poorly Drained	Best

1-9 Scale: 1 = Best, 9 = Worst, (-) = Not Available, NA = Not Applicable.
Adaptation and Responses: Best > Good > Fair > Poor.

R = Resistant, S = Susceptible.

* Represents an assessment of stand establishment, chlorosis severity and yield performance

Performance evaluations are based on field observations and public information. Data from multiple locations and years should be consulted whenever possible. Individual results may vary depending on local growing, soil and weather conditions. IMPORTANT: ALWAYS READ AND FOLLOW SEED BAG/TAG DIRECTIONS.

**LIBERTY
LINK**

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
